

## **Product features and usage introduction**

Low power LED bulb uses high flux bright LED as lighting source, the shell uses the high quality and PC material, fully has safeguarded the LED radiation request and the service life. The LED power source actuates to use PWM high accuracy technology, the efficiency is high, quantity of heat is low, energy conservation is remarkable. Compare to the traditional lighting source, it does not have the ultraviolet ray and the infrared radiation. LED lighting source has much advantage today on power saving and environment protection.

The LED bulb can be applied to: Hotel, guesthouse, recreation area; Museum, art center, exhibition hall and so on partial key illumination; Various jewelry, cosmetics and so on upscale exclusive agency display window special cabinet illumination; Also provide more choices for home decoration.

Item No	Lamp holder	Voltage	LED Q'ty	Power	Color	Luminous flux	Picture
TSL-BL001	E14 ϕ 24*60mm	12V/DC	4pcs	0.2W	White	10-12lm	
					Warm white	8-10lm	
					Red	2-4lm	
					Yellow	2-4lm	
					Blue	1-2lm	
Green	10-12lm						

TSL-BL002	E14 E27 ϕ 40*110mm	110V/AC 220V/AC	21pcs	1.0W	White	60-70lm	
					Warm white	55-65lm	
					Red	15-20lm	
					Yellow	15-20lm	
					Blue	8-12lm
