

Product features and usage introduction

LED flood light use import 1W, 3W the high efficiency high huqlity LED as the lighting source, take the aluminum basic electric board to make the cooling system, guarantees LED the extra long service life and the light effect stability. Each LED light is joined to secondary high-light efficiency lens, adjusts the lamps and lanterns to shine the angle, reasonably causes the light assignment, to be highly effective. Divide according to the LED arrangement way and the lamps and lanterns contour. There are single color red, blue, yellow and white, also entire color and so on as choices.

LED flood light are widely apply to th building inside and outside decorative lighting, the afforested landscape illumination, the billboard illumination, the recreation area atmosphere illumination and so on, LED wall washer light can realize gradual changes, jump, the color glitters and so on the dynamic effects through internal microchip controller. And also realizes the entire color to pursue the dynamic effect which, the running water, the scanning and so on many kinds of dazzles through external DMX512 controller, Along with the LED technology rapid development, LED wall washer light substitution traditional flood light is the inevitable tendency.

Item No.	Voltage	Size (mm)	LED Q'ty	Color	Picture
TSL-WW098WW	24V 110V 220V	140*98*100	9pcs*1W 12pcs*1W	Warm white
