

LED CORNER LIGHT SERIES

Product features and usage introduction

LED as light source, LED Corner light is a RGB (Red, Green and Blue) or Single color, under-water illumination light, which can produce 256 gray changes. Intel light controller can work synchronously and connect DMX controller. The user can input data for programmed control. Stainless steel outer covering, sealed lamp, adjusted projecting angle and place make it achieve the satisfied effects. The LED squared wall light employs low-voltage power safe and power-saving, long performance and durable. One wire connects power source and controller system, easy for installation.
